09.2025–Now	Jeppesen ForeFlight via Insight Global <i>Exchange Engineer & Mail Administrator</i> Migrate on-premise Exchange 2016 servers and Proofpoint from Jeppesen/Boeing to cloud-based IAM services and cloud-based Proofpoint as a part of the divestiture of Jeppesen from Boeing. Extensive PowerShell module built from the ground up to facilitate reporting and movement of mailboxes between destinations. Maintain cybersecurity operations and data-handling compliance with CMMC, NIST SP 800-171, ITAR, and CUI requirements throughout the migration.	Denver, CO
09.23–03.25	TAKKION (TP&L Management Solutions) via Spectrum Search Group <i>IT Cloud Developer</i> Migrate C#/.NET and Python Applications to the GCP/Azure cloud environment. Implement automated account provisioning on Microsoft Azure Entra ID through Paylocity's API with serverless functions and webhooks.	Broomfield, CO
07.22–09.23	American Express via Apex Systems <i>Python & SQL Developer</i> Migrate massive dataset from Teradata to Hive and ensure 1:1 mapping of rules and regulatory reports through TSQL to Hive SQL. Utilize GCP, AWS, JFrog, and Jira for CI/CD. Written a Python package to pull HiveQL Query results and format them using a personally written Python package for CornerStone to convert the data into XML format for reporting requirements as requested by FR, MX, IT, and NL. Utilize Azure cloud functions and Spring Boot for microservices. ETL pipelines. SQLAlchemy library for interaction with Python and C#/.NET.	Phoenix, AZ
06.22–12.22	Aimm Online & Talking App Kit (Temporary) <i>Artificial Intelligence Developer</i> Utilize Python & Swift to port iOS version of Talking App Kit (the back-end behind Aimm Online (An AI-driven dating application) to the web using locally-hosted APIs. GCP for continuous integration and continuous deployment.	Denver, CO
04.22–06.22	LongPath Technologies (Temporary) <i>Software Engineer</i> Front end developer focusing on Flutter, Kotlin, Angular.js, Next.js, TypeScript, .NET, MongoDB, CI/CD. This involved both a web application with accessibility for viewing on various devices as well as a native Android and iOS application used by our clients. We created a system which utilizes lasers to measure and report the levels of emissions emitted. Utilize GCP for CI/CD and app delivery. Pandas used for data processing.	Denver, CO
04.21–04.22	Clear Cannabis Inc. <i>Jr. Systems Developer</i> PHP, .NET and C# backend engineer developing applications for internal and licensee use as well as support Salesforce/Accumatica/Locate ERP API and Web-Hook based customization. PostgreSQL, MariaDB, and Redis used for data operations and storage. Refactored web server using Clojure to utilize concurrency and increase speed for the end users. Develop CI/CD pipelines within Azure and Jira for delivery of industry specific tools and scripts to facilitate easier reporting. .NET Core and Azure functions were used to facilitate the regulatory reporting automations.	Denver, CO
05.20–04.21	Wolfpac Cannabis <i>Systems Administrator</i> Ensure compliance with the Colorado Revised Statutes, DOR Compliance Tips and state + local laws and maintain "Seed-to-Sale" tracking of regulated marijuana product. Develop automated software solutions through scripting and REST APIs for communication between the Point-of-Sale system and the state's tracking system: METRC. Application pipeline through Google Cloud Platform (GCP). Utilized Redis and MySQL for customer and sales data. Host C#/.NET and Python scripts to increase the ease-of-use for managers to report to the state entities responsible for regulation.	Denver, CO

- 10.18–05.20 **Igadi, Ltd.** *Lafayette, CO*
IT Systems Administrator, Compliance Officer
Ensure compliance with the Colorado Revised Statutes, DOR Compliance Tips and state + local laws. Extensive experience with Azure SQL Server for customer purchase data analytics across 6 stores. Construct website with Angular.js and Django/Flask. CI/CD through Github Actions for deployment.
- 07.17–10.18 **International Business Machines Corp. (IBM) servicing
State Street Investment Bank & Anthem Healthcare via Career Connection Incorporated** Boulder, CO
Sys Admin, Global Technology Services: Solutions, Del, & Transf. Responsibilities:
- Write troubleshooting and DevOps documentation and SLA status templates
 - z/OS Mainframe Operations utilizing DB2, JCL, and COBOL
 - Act as “Linux Focal” and lead complex resolutions for RHEL and C++ applications
 - Deploy and maintain applications and VDIs for Windows 10 and Ent. Server systems
 - CI/CD Through Bluestacks, maintained via Python serverless functions.
